DETAILED ACTION

This office action is in response to the filing of the application on 1/5/04 and the preliminary amendment filed 3/15/04.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-37, drawn to a circuit for amplifying signals including a method of amplifying signals apparently based on the use of said circuit, classified in class 365, subclass 207+.
 - II. Claims 38-42, drawn to a semiconductor device, classified in class 257, subclass 312.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because another voltage-variable capacitor could be used instead of the semiconductor device of claim 38, for instance by substituting said semiconductor device with one wherein no source region abuts the insulator. The subcombination has separate utility such as any other utility of a gate insulated field effect transistor with body bias, such as are used in ESD protection circuitry.

Art Unit: 2826

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
